

COMPANY OVERVIEW:

Hudson Valley Plastics (previously known as Lumelite and Joe Pietryka, Inc.) was rebranded in 2018. For 75 years, the business has been a leader in injection molding, manufacturing small custom parts, specializing in both small and large runs.

Since rebranding we have become a fierce competitor for manufacturing precision parts, with many secondary applications including assemblies, hot stamping, offset and silkscreen printing. We have positioned ourselves as a primary supplier to a global client base which spans the cosmetic, pharmaceutical, nutraceutical, medical, automotive and packaging industries. We pride ourselves in making quality parts with competitive pricing and exceptional customer service.

Our recent purchases of brand-new Arburg injection molding presses and high-speed printers with smart vision systems have allowed us to ramp up our automated production capabilities. We have become a single site source for many of our customers with multipart assembly, specific packaging, and decorating. We have the ability to color match, create and deliver the right look for any finished product.

CORE COMPETENCIES:

Quality Services:

- Pre-production samples and reports
- GMP, operational guidelines with full traceability
- Keyence IM-7020 image measurement system with light probe
- Micro-Vu System, for dimensional analysis, microscopic photo capability
- Light transmission testing
- Torque and pull testing
- Pressure testing
- Flow testing
- Keyence Smart Vision System with XG-X2902 Controller, CA-HL04MX 4K Line Scan Camera for 100 % inspection of printed parts

Parts Assembly

Our automated production capabilities extend to multi-part assembly for products that require the combination of multiple parts. Syringes, bottles with caps, cosmetic applicators, and some industrial parts are a few examples. We can mold the individual components and assemble them into a final product, bagged and ready to ship.

Combination of Decorating Processes

Along with molding quality plastic components, Hudson Valley Plastics, as part of our "Single-Site Sourcing," can process all your decorating needs. We have both silkscreen and offset printing as well as hot stamping capabilities. In addition, Hudson Valley Plastics can facilitate a variety of decorating alternatives to enhance your products marketability. Whether you prefer silk screening, labeling, molded in logos, or a combination decoration, Hudson Valley Plastics can custom color match, create, and deliver the right look for your finished product.

DIFFERENTIATORS:

Hudson Valley Plastics separates itself from its competitors by offering production, assembly, packaging, and shipping of its products all on site, at one place. Whether it is something as simple as a dosage cup or as challenging as a total product assembly, Hudson Valley Plastics makes them right, on time, the first time.
